

# Bacterius™ 1B, Dry Concentrated Beneficial Bacteria

# Bacterius

## Affordable and safe for people, pets, plants.

Bacterius™ 1B can be used in water gardens, ponds and lakes as an affordable method to maintain excellent water quality. Users of Bacterius™ 1B notice improved clarity of water and reduction of odours transforming backyard ponds into enticing swimming holes. Safe for humans, all aquatic life, plants and pets. Results are even more impressive when Bacterius™ 1B is used in the presence of lake bottom aeration.

## Product Information and Technical Specifications

### Restore that favourite summer swimming hole.

Bacterius™ 1B contains Canadian blends of beneficial bacteria grown in concentrations to improve the health of your pond.

Treating your pond with Bacterius™ 1B creates conditions that will reduce dissolved organic carbon and organic sediments. It will improve water clarity, reduce odours, reduce organic bottom-sludge (muck). Enhance the aquatic environment naturally.

Bacterius™ 1B is packaged in pre-measured water-soluble packets, to allow for easy dosing application. Bacterius™ 1B dry formula consists of billions of microbial cultures from beneficial bacterial strains specifically chosen to reduce ammonia levels, nitrates, algae and bottom sludge from both cellulose and lignin components of dead and decaying algae and vegetation.

Reduces the odor and murky water associated with various types of accumulated organic wastes in lakes and ponds.
